

**~NOTICE~****Office of River Protection****TEMPORARY AUTHORIZATION SOUGHT TO  
COMPLETE CONSTRUCTION OF THE  
INTEGRATED DISPOSAL FACILITY (IDF)  
ANCILLARY STRUCTURES**

The Department of Energy – Office of River Protection (DOE-ORP) is requesting temporary permit authorization pursuant to WAC-173-303-830(4)(e) for 180 days to complete construction of Integrated Disposal Facility (IDF) ancillary structures.

The construction of the IDF is on an aggressive schedule. The Temporary Authorization allows DOE-ORP to initiate construction activities at the IDF thereby maintaining its schedule for cleanup and closure of the Hanford Site as required by the *Hanford Federal Facility Agreement and Consent Order* also known as the Tri-Party Agreement (TPA). This schedule is dependent on having a disposal pathway that is permitted to receive low-level waste and mixed low-level waste that will result from cleanup and closure activities.

Activities under the Temporary Authorization will be limited to construction of ancillary structures at the IDF.

If you would like further information, please visit our website at:
